

ALIGNMENT

Text is an ongoing sequence of words,
distinct from shorter headlines or captions.

The main block is often called
the “body,”

comprising the principal mass of content.

Also known as “running text,”
it can flow from one page, column, or box to another.

Text can be viewed as a thing
—a sound and sturdy object—
or a fluid poured into the containers of page or screen.

Text can be solid or liquid,
body or blood.

Text is an ongoing sequence of words, distinct from shorter headlines or captions. The main block is often called the “body,” comprising the principal mass of content. Also known as “running text,” it can flow from one page, column, or box to another. Text can be viewed as a thing—a sound and sturdy object—or a fluid poured into the containers of page or screen. Text can be solid or liquid, body or blood. As body, text has more integrity and wholeness than the elements that surround it, from pictures, captions, and page numbers to banners, buttons, and menus. Designers generally treat a body of text consistently, letting it appear as a coherent substance that is distributed across the spaces of a document. In digital media, long texts are typically broken into chunks that can be accessed by search engines or hypertext links. Contemporary designers and writers produce content for various contexts, from the pages of print to an array of software environments, screen conditions, and digital devices, each posing its own limits and opportunities.
